- FLOOR/REINFORCED CONCRETE WALL ANCHORAGE

Two methods can be used to fix columns or bars to the wall on reinforced concrete:

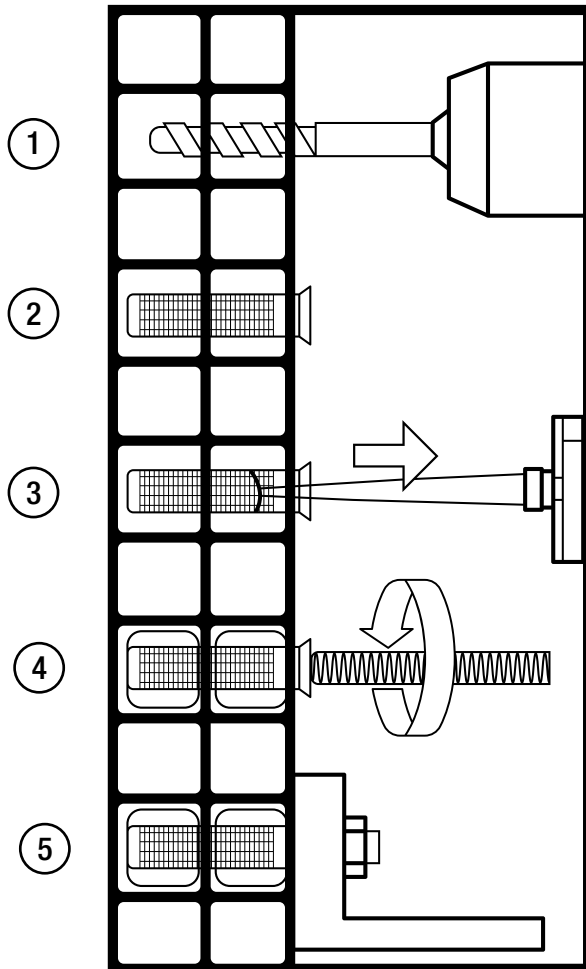

1- METAL EXPANSION PLUG Ø 16 L STANDARD

2- TWO-COMPONENT RESIN ANCHORAGE

-PERFORATED BRICKS WITH TWO-COMPONENT RESIN ANCORAGE

NB: The material for mounting both metal dowels and two-component resin can be purchased from a technical hardware store or can be requested from our company.
